No Stop Orders in These

No Stop Orders in These.

A veteran member of the New York
Stock Exchange, who deals largely in inactive, high-class, unlisted industrials,
was accorded yesterday by a number of
his brethren, many of whose clients had
suffered by stop-loss orders having been
reached, with a query from one as tohow many of his customers had been
caught on stop orders during the recent
sump in prices.

"Not one," he answered. "There has
not been much of a decline in any of the
stocks of my clients," he exclaimed.
Paradoxical as it may sound, I confine
my activities to inactive issues, and
there has been very little, if any,
change in prices in most of those
stocks."

change in prices in most of those stocks.

Asked for an explanation of why his specialities had gone off so little in a heavily declining market such as has existed for a month past, he replied: "I arount for it by the absence and difficulty of spetting quotations. Bid and asked prices, even, cannot always be easily obtahed on such stocks as Singer Sewing Machine, Ota Elevator, American Chicle, Remington Typewriter, and a force or more of others, good, high-class but inactive stocks. Holders of these stocks do not hang over the ticker watching for every fluctuation of an eighth or a quarter. Consequently they do not get paniestricken in a declining market.

In addition to the Minnesota rate cases, the decision in which will also cover the Missouri rate cages, a total of about forty, there are a number of important interestate commerce cases awaiting decision, so that every Monday will be an important day from now on.

No one has any "life" from the court, and, therefore, it is not safe to wager on it, but the lawyers who have studied the cases think the decision will falt that way.

Houston is Told.

The high standard of cleanliness maintained at the rovernment-owned dater at the Naval Academy at Annapolis has won much praise from the members of the New York Milk Committee, which recently visited the institution, according to a letter received by Secretary Datales yesterday from Secretary of Agriculture Houston.

The entablishment of the government dairy at Annapolis was the result of the Inability of the scademy officials to get milk of dependable purity from outside sources for use in the academy kitchen and diring half. With the assistance of the Department of Agriculture a dairy was established in 1911, which has brought most satisfactory results.

A herd of seventy-five Holstein cowe is maintained. They give a yield of about 300 gallons of milk daily. The most efficient means known are employed to secure the purity of the milk.
